

UCAV Fleet - Shahed 129 Gen 2

Type: Unmanned Combat Aerial Vehicle (UCAV)	Crew: 0
Min Speed: 65 kt	Max Speed: 95 kt
Wingspan: 16 m	Height: 2 m
Length: 8 m	Max Payload: 0 kg
Empty Weight: 0 kg	Max Weight: 800 kg
Operator: Navy	Commissioned: 2019
Propulsion: 1x Rotax 914 Piston Engine	Turboprop

The Shahed 129 family did not stop with the Gen-1 systems, which were often considered museum pieces in Western discourse. Focusing on the soft aspects of fleet strength, Iran focused on what it could make, fly, and maintain rather than chasing the latest technology. Under immense sanctions pressure, the Shahed 129 was spotted with a SAR pod in May of 2023. Similar to the General Atomics program, i.e., the MQ-1 series, this drone has seen periodic upgrades and, most importantly, NLOS (Non-Line of Sight) navigation capability. In turn, this upgrade allows the second generation of the Shahed 129 to make full use of its claimed 1000 km+ range and strike capabilities. Capable of carrying a wide range of sensors and Iran’s Sadid family of guided weapons, this drone sits at the intersection of pure ISR and native strike capabilities, allowing for a diverse mission profile.

Weapons / Loadouts:
Sadid-345 [TV/EO] - (Iran, IRGC, Toophan Mod) Guided Weapon Surface Max: 6 km. Land Max: 6 km.
Sadid-345 [IIR] - (Iran, IRGC, Toophan Mod) Guided Weapon Surface Max: 6 km. Land Max: 6 km.
Sadid-345 [LST] - (Iran, IRGC, Toophan Mod) Guided Weapon Surface Max: 6 km. Land Max: 6 km.
Sadid-1 - (Iran, Sadid-361, Fat'h 362, Toophan Mod) Guided Weapon Surface Max: 3.9 km. Land Max: 3.9 km.
Generic SAR Pod - (UAVs, Short-Range) Sensor Pod

Much like the Shahed 147, this too was seen in the exhibition for journalists in 2023 where Iran’s fleet of drones was put on display. Iran’s drone program has progressed far beyond using repurposed F-14 Tomcat cameras. Using Gen-2 and later Gen-3 sensors, they have become a potent ISR package.

Sensors / EW:

Generic TV Camera - (2nd Gen, Surveillance, 8x Magnification) Visual
Visual, Surveillance TV Camera
Max Range: 55.6 km

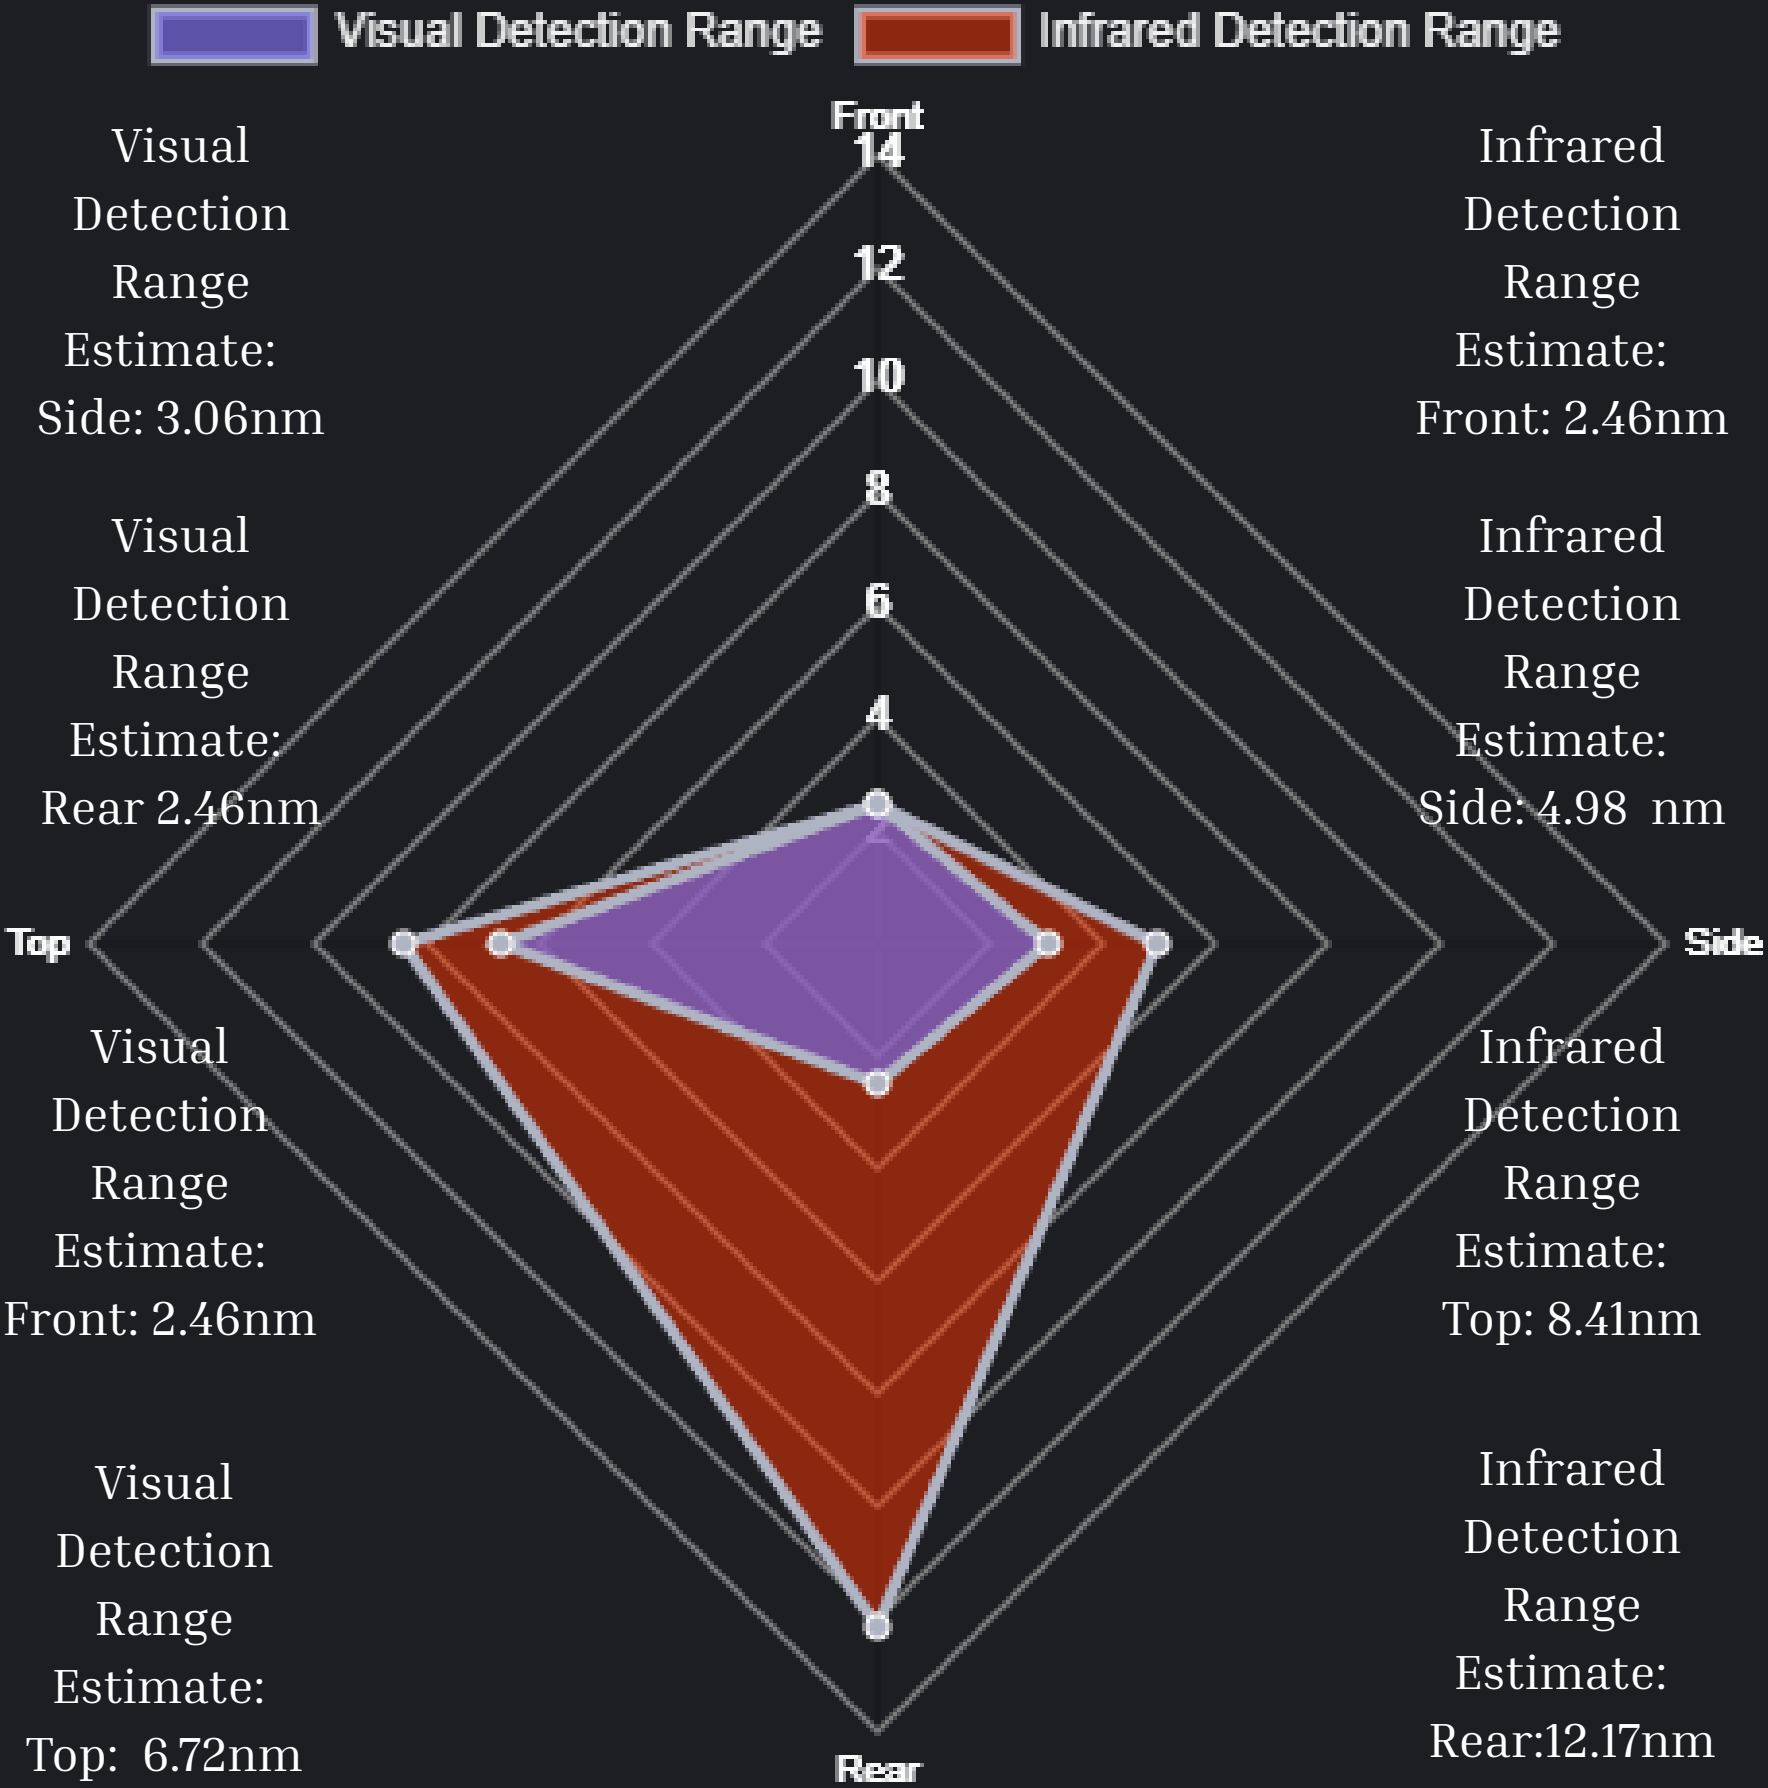

Generic IR Camera - (2nd Gen, Surveillance) Infrared
Infrared, Surveillance Camera
Max Range: 55.6 km

Generic Laser Designator - (Anti-Air & Surface) Laser Designator
Laser Target Designator & Ranger (LTD/R)
Max Range: 18.5 km

Generic SAR/MTI - (UAVs, Short Range) Radar
Radar, Surface Search, Short-Range
Max Range: 92.6 km
