Telefly JT80

Type: Turbo Jet Engine/Aircraft Turbine Engine
Model: Telefly JT80
Diameter(mm):
Length(mm):
Weight(g): 11500
Max Speed(rpm): 61000
Idle Speed(rpm): 30000
Thrust(kg): 80
Rated Exhaust Temperature(°C): 720
Full Throttle Fuel Consumption(g/min): 2150
Fuel Used: Kerosene/Diesel
Lubricating Oil: 5% kero/3% diesel
Regular Maintenance Period(h): 25

Telefly JT80 is an example of a COTS, or, Commercial off the Shelf Component

Possessed by

- Iran, Russia

Alternate name

- Geran-3

Class

- UAV

Length

- 3.5 m

Wingspan

- 3 m

Payload

- 50 – 90 kg

Status

- Operational

Weight

- 250 – 370 kg

Speed

- 300 – 600 km per hour

According to GUR/HUR, the Russian-built Geran-3 is equipped with a Chinese JT80 turbojet engine (i.e., a maximum thrust of ~785 newtons, or 80 kg) and can fly at a speed of 300-370 km/h over a maximum range of 1000 kilometers.

This drone was unveiled in November of 2023 and was showcased with 3 different guidance systems. Namely, the guided systems were RADAR, GNSS, and IR/TV guidance.

The introduction of the IR/TV and radar guidance changes the equation militarily; a RADAR-guided SHAHED 238 can be seen as a potent analogue for HARM missiles. The Shahed series’ role seems to be moving past attacking fixed structures and towards more of a Jack-of-all-Trades munition capable of striking targets past 1000 km.

Stat Sheet

Fatal Distance	10.23	Houses completely demolished	6.62
		Houses badly damaged, beyond repair, require demolition	9.79
Lung Damage	16.22	Houses rendered uninhabitable, can be repaired with extensive work	17.09
		Houses rendered uninhabitable, can be repaired reasonably quickly	29.36
Eardrum Rupture	41.71	Houses require repairs, serious inconvenience but remain habitable	58.72
